

GOODYEAR PRINTING STOCK INKS

For generations, Van Son printing inks have set the standard for quality and performance in pressrooms around the world - including ours. We keep on hand the following colors from Van Son's line of [Rotason®](#), [Tough-Tex®](#), [Unipak](#), and [Fluorescent](#) inks. All [Pantone®](#) colors are available as special mixes and/or special orders from Van Son.

GOLD	SILVER	WHITE

The colors on this page are online simulations of Pantone Colors. Actual colors may vary!

Infinity®

This acrylic ink dries hard and fast on coated and uncoated stocks and has a unique varnish concept that virtually eliminates toning.

Tough Tex®

For non-porous surfaces such as foils, plastics and varnished or synthetically coated surfaces, as well as traditional stocks. It dries by oxidation and features exceptional rub-and heat resistance - ideal for printed material that will ultimately run through copiers or laser printers. Stocked in black, this ink is available in most Pantone® colors.

PANTONE® Color Mixed Inks

PANTONE Special Mix Colors are available in any Van Son formulation.

Unipak Gold and Silver

Unipak is a pre-mixed metallic ink available in several shades of silver and gold. Unipak inks have high brilliance, good printability, excellent rub resistance and are extremely opaque.

Fluorescent Inks

This easy-running oil-base formula runs beautifully on our PrintMaster press. Several colors are available.
